Re: WT Docket No. 07-54, *Antenna Requirements for the 10.7 – 11.7 GHz Band*

Dear Ms. Dortch:

On behalf of the Fixed Wireless Communications Coalition (FWCC), I am electronically filing this written *ex parte* communication pursuant to Section 1.1206(b)(1) of the Commission's Rules.¹

The FWCC supports the filing of FiberTower Corporation of September 4, 2007. In particular, the FWCC has no objection to the Commission's including, in a Report and Order authorizing 0.61 meter antennas at 11 GHz, a statement of policy to the effect that aggregate interference to MSS gateways is a legitimate concern, and that the Commission requires all applicants for new or modified fixed service facilities in the band to carefully coordinate their operations with any licensed gateway operations so as to avoid such interference.

¹ The FWCC is a coalition of companies, associations, and individuals interested in the Fixed Service -- *i.e.*, in terrestrial fixed microwave communications. Our membership includes manufacturers of microwave equipment, licensees of terrestrial fixed microwave systems and their associations, and communications service providers and their associations. The membership also includes railroads, public utilities, petroleum and pipeline entities, public safety agencies, cable TV and private cable providers, backhaul providers, and/or their respective associations, communications carriers, and telecommunications attorneys and engineers. Our members build, install, and use both licensed and unlicensed point-to-point, point-to-multipoint, and other fixed wireless systems, in frequency bands from 900 MHz to 95 GHz. For more information, see www.fwcc.us.
